### New Labside solution! Pre-milled range for Axiom® BL and TL

Pre-milled range is a Labside solution to perform in-house customized abutments on Axiom® BL&TL implants. The assortment of 2 types of Pre-milled, PreFace abutments and Ti-Forms abutments, provides compatibility with main CAD and CAM softwares and milling equipments, achieving seamless integration in dental laboratories workflows.

This “Original on Original” solution guarantees a perfect fit thanks to exact connection and high-quality manufacturing. Using Anthogyr Pre-milled, dental professionals benefit of Anthogyr Serenity® warranty program.

#### BENEFITS

*Axiom® BL and TL connections*

#### + Flexibility and efficiency:

- PreFace abutments compatible with Exocad, 3Shape and Dental Wings® CAD softwares, main CAM softwares and milling equipments (Medentika® holder)
- Ti-Forms abutments compatible with CARES® visual CAD software and Straumann® CARES® M-Series milling machine (Amann® Girrbach holder)
- Free access to CAD libraries
- All digital workflows: from an Intra Oral Scanner or a laboratory scanner

#### + Serenity and warranty:

- Original on Original
- Serenity® warranty program

#### + Comprehensive range:

- For Axiom® BL and Axiom® TL (R and N platforms)
- PreFace abutments available in 2 diameters to cover all indications
